DOOR KNOBS.

NOTICE.

The Iron which we use in Spindling our Knobs is made expressly to our own gauge, and fitted to our Locks. Parties using our Locks will find it to their advantage to use our Knobs.

Our Knobs are Spindled to vary in length as follows :--

Whipple Patent Knobs, both Rim and Mortise, extend five-eighths of an inch—as $\frac{7}{8}$ to $1\frac{1}{2}$ inch, $1\frac{3}{8}$ to 2 inches, etc.

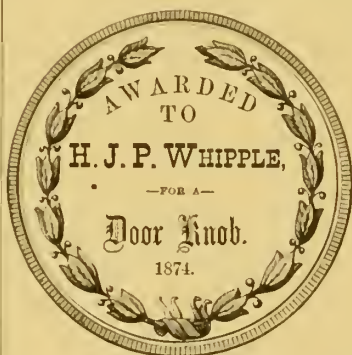

Common Rim Knobs, three-quarters of an inch—as $1\frac{1}{2}$ to $2\frac{1}{4}$ inches, etc.

Common Mortise Knobs, one inch—as 1 to 2 inches, etc.

WHIPPLE'S PATENT DOOR KNOB.

PATENTED JULY 29th, 1873.

We call the special attention of the Trade to these Knobs, with the assurance that we are offering them the **only perfect and durable Door Knob**. We manufacture them in all styles, Mineral, Porcelain, Real Bronze, &c., and at a trifling advance in cost over the common Knob. They are **easy to put on and sure to stay**. We guarantee satisfaction, and warrant every Knob. We were

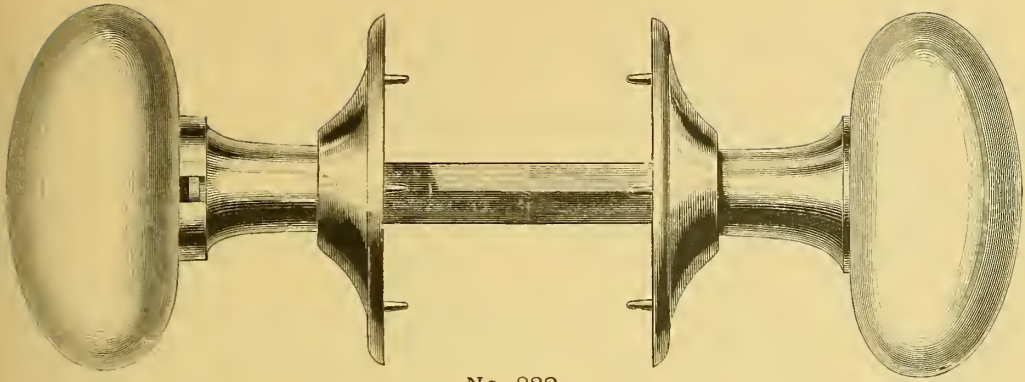

AWARDED
A
BRONZE MEDAL
AT

THE AMERICAN INSTITUTE FAIR

FOR 1874.

The Judges say: "We consider this method of fastening **Door Knobs** a great improvement over anything yet invented for the purpose, as it obviates the use of side screws and washers, and can be regulated to suit any thickness of Doors."

No. 832.

WHIPPLE'S PATENT DOOR KNOBS.

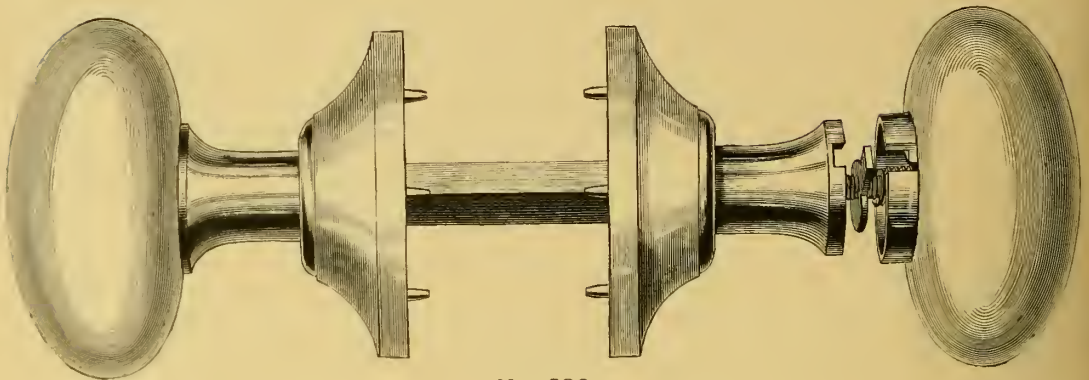

MINERAL.

NO.	DIAM. OF KNOB.	DESCRIPTION.	Per Dozen.

Full size of Key.

THE IMPROVED SHEPARDSON PATENT LOCKS.

We take pleasure in introducing to the notice of our patrons the IMPROVED SHEPARDSON LOCK, believing them to be the most secure Lock of the kind in the market, while for *beauty of design and finish, durability, and good workmanship*, they are SUPERIOR to any.

The parts are made interchangeable, so that they can be renewed, in case of wear, without trouble or great expense.

They can be applied to old work without defacing it, as the old key-hole is removed in boring for the cylinder.

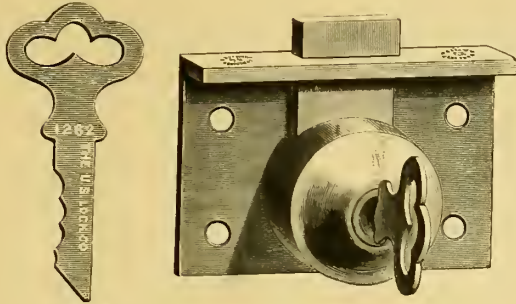

They are now used by the most prominent Desk and Furniture Manufacturers, to whom we refer those who wish to know how they have stood the test of actual wear.

The number of changes obtained is very large, ranging from 10,000 in four tumbler Locks, to 1,000,000 in a six tumbler Lock.

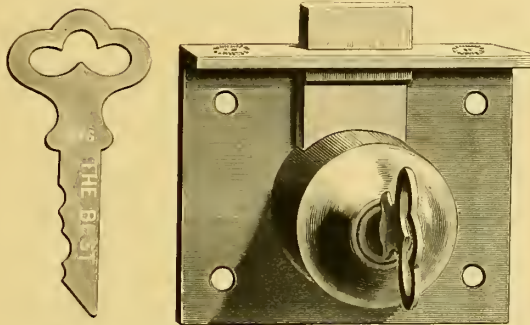

Duplicate Keys can be supplied promptly.

Our arrangements with the manufacturers are such that we guarantee our prices to be as low as the Locks can be obtained.

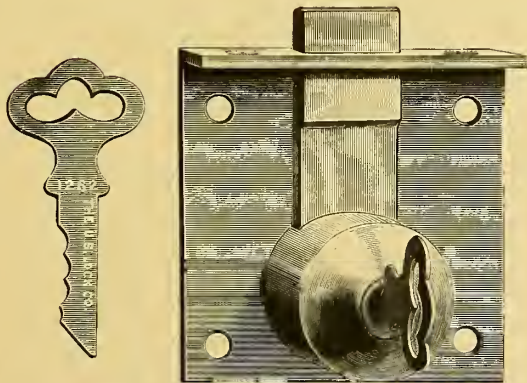

We respectfully solicit a trial for the Locks.

Nos. 50 to 53 1-2 and 050 to 053 1-2.

Nos. 60 to 63 1-2 and 060 to 063 1-2.

Nos. 66 to 69 1-2 and 066 to 069 1-2.

(For Description, see pages 172 and 173.)

IMPROVED SHEPARDSON DRAWER LOCKS.

1 INCH DROP.

NEW AND IMPROVED PATENT
CUTTING NIPPERS.

The cutting parts A A, are made to gauge, of choice Steel. They can be taken off to be ground, and when worn out can be replaced at slight expense, making the tool as good as new, while the old kind, as soon as broken, (which is in a short time, on account of the intense heat necessary to weld the Steel on,) are good for nothing but old iron.

This improvement makes the tool the best and cheapest that you can have in your shop.

All extra Cutters warranted to interchange.

NO.	SIZE.	Each.				
1	11 in.	-	-	-	-	-
2	10 in.	-	-	-	-	-
3	9 in.	-	-	-	-	-
4	7 in.	-	-	-	-	-
5	5 in.	-	-	-	-	-

The length is measured from the Joint to the end of the Handles.

EXTRA CUTTERS 25 CENTS PER PAIR.
